

Biotics Research is pleased to announce  
the launch of two new products!

# EGCG-200mg

EGCG (epigallocatechin-3-gallate) is considered the most active of the green tea catechins. EGCG possesses significant antioxidant activity, it supports healthy cardiovascular and immune function, cognitive function via neuroprotective properties, and is supportive of normal healthy glucose levels.

Biotics Research is pleased to announce  
the launch of two new products!

# Melatonin-B6/Mg

Melatonin, an indole neurohormone, is referred to as the biological time keeper, functions the body's circadian rhythm, and also possesses antioxidant properties. B6 (as P5P) is important for protein synthesis and is involved in GABA production and conversion of dopa to dopamine. Magnesium is important in many processes, both structural and dynamic as a cofactor of enzyme activities.
