

NitroGreens®

How Green are Your Greens?

With **NitroGreens®** you can see, smell and taste the difference!

- 100% All Organic Blend
- Extremely High Chlorophyll Content
- Enzymatically Active
- Ingredients Grown From Heirloom Seeds*
- No Inexpensive Fiber Fillers
- No Nutritional Window Dressing
- High ORAC Value

NitroGreens® is a rich source of phytonutrients including isoflavones, polyphenols, natural carotenoids, betalains, glucosinolates and isothiocyanates, as well as naturally occurring enzymes, vitamins and trace minerals.

* An heirloom seed comes from the old, genetically “unaltered” plant varieties which reproduce through open-pollination. These seeds come from plants that reproduce themselves year after year naturally with the aid of wind, rain and pollinating insects. NitroGreens® uses vegetation produced from heirloom seeds where possible.

“The Best of Science and Nature”

NitroGreens®

Western diets tend to be highly inflammatory in nature, consisting of commercially processed and packaged food, along with a high consumption of meat, dairy, refined carbohydrate and sugars. As a consequence, the internal pH is often acidic and not within the optimal range. Being alkalizing in nature, **NitroGreens®** provides balance to the typical, highly acidic Western diet.

NitroGreens® supplies an all organic proprietary blend of grass juices, vegetable sprout concentrates and vegetable juices providing important phytonutrients and offering significant antioxidant protection, as evidenced by its high ORAC Value.

NitroGreens®

supplies an all organic blend of grass juices, vegetable sprout concentrates and vegetable juices .

NitroGreens® supplies organic juice from barley grass, wheat grass, oat grass, alfalfa grass and kamut grass. With its high chlorophyll content, it supports healthy pH balance, GI function and gut health. It also supplies naturally occurring carotenoids and enzymes which provide important antioxidant activity.

NitroGreens® supplies organic vegetable sprout concentrates from

broccoli, cauliflower and kale – cruciferous vegetables providing glucosinolates and isothiocyanates, potent cellular protectants which act via the induction of phase 2 detoxification enzymes. These concentrates are a rich source of naturally occurring carotenoids including beta carotene, lutein and zeaxanthin.

NitroGreens® supplies organic vegetable juice from carrots and beets. Carrot juice is an excellent source of naturally occurring antioxidants. Beet juice supplies betalains, derivative of betalamic acid, which has been shown to inhibit lipid peroxidation and heme decomposition.

NitroGreens® supplies organic acerola berry extract, providing naturally occurring vitamin C, as well as naturally occurring carotenoids and bioflavonoids. Acerola has been shown to possess hepato-protective properties due to its significant antioxidant activity.

NitroGreens® also supplies organic peppermint leaf. The phenolic constituents of peppermint leaves include rosmarinic acid and flavonoids, including eriocitrin, luteolin and hesperidin. It possesses significant antioxidant activity and provides support for healthy GI function.

Each bottle of **NitroGreens®** supplies 30 servings of 100% organic juices, extracts and concentrates.

NitroGreens® is available in 8.6 ounce bottles (#1111).

Nutrition Facts

Servings Per Container: 30

Serving Size: 8 g (approx. 1 scoop)

Amount Per Serving

Calories 30

		% Daily Value*
Total Fat	0.5g	1%
Sodium	55mg	2%
